Projects

- **Calculator**
This **C programming** project focuses on the development of a modern and intelligent calculator application that goes beyond basic arithmetic operations. The smart calculator integrates advanced mathematical functions, scientific calculations, and a user-friendly interface to enhance overall user experience.
- **Currency Converter Using GUI Components**
The Currency Converter is a simple **Java** based graphical user interface (GUI) application that allows users to convert an amount in USD (United States Dollar) to various other currencies, including Euro (EUR), British Pound (GBP), Indian Rupee (INR), and Japanese Yen (JPY). Built using the Swing framework, the application provides an easy-to-use interface where users input an amount in USD, select a target currency from a dropdown menu, and click a button to view the converted amount.
